

Good morning everyone,

We have learnt a lot from presentation yesterday and we can wrap up that:

1. We saw the short video about the history of Mahidol University, research on Dengue, Malaria and STH
2. Prof. JitraVaiyakul present about Mahidol University. Then, she presented schedule of training course especially field visit.
3. Ms. Jane introduced the FRESH framework for past, present and future especially she shows the effect of school children's health and education. The students who take medicine could attend the class regularly, have good health and got good score more than other students who do not de-worm.
4. Prof. Jun Kobayashi presented about the regional overview of school health and nutrition by focusing to the situation of school health and nutrition in underdeveloped country especially Lao PDR. Lao PDR had the national coordination meeting for school health in 2004 and 2005 with concerned agencies and some development partners. And then they set up school health task force team between MOE & MOH that have specific responsibility on (1)supervise M&E for project; (2)Develop the materials; (3)formulation of national policy implementation. After that he focused on WHO school health technical meeting "Global school health initiation" achieve health and education outcome in Bangkok in 2015. It focused on policy and practice, policy management, health service and health in EFA.
5. Prof. Dr. Ma Sandra presented the School health implementation from SEAMEO perspective, such as:
 - SEAMEO history in brief
 - SEMEO Vision
 - SEAMEO Mission
 - SEAMEO TROP MED Network
 - Main Functions of SEAMEO TROP MED network: school Health and School health relate activities.
 - Mental health Project in Phangnga, Thailand
 - Control of HIV/AIDS partnership in region.
6. We learnt a lot among country presentation that would be way forward for us to improve school health and nutrition for each country.
Challenges among some countries there are:
 - 1) School health policy;
 - 2) Coordination between Ministry if Education and Ministry of health/concerned Agencies;
 - 3) Management and Maintenance of WASH infrastructure at school level;
 - 4) Funding allocation from Government;
 - 5) Lack of interesting from principals;
 - 6) Monitoring and Evaluation.
